Your dog deserves the best

Swedish-made supplements and animal
care products since 1954

Our entire product range is underpinned by scientific research. Our expertise, extensive experience, and our advisors specialized in physiology and nutrition will help you provide the right conditions for the health and well-being of your dog. Because no two dogs are the same, we offer a wide range of products to cater for their every need. Always the highest quality. Always a high concentration of active ingredients. Always made in Sweden.

Because your dog is worth it.

Vitamins & Minerals

B-Vitamin

The outside is often a reflection of the inside. A dog with a glossy and healthy coat signals well-being. Your dog may need extra support in different situations and stages of life, such as during coat changes or pregnancy, where extra vitamin B may be helpful.

During periods of excessive strain vitamin B may be beneficial for your dog. Vitamin B is primarily recommended for active and regularly exercised dogs, pregnant and lactating females, dogs with reduced coat quality, or during periods of shedding. It may also be given as a daily supplement to support coat quality.

MultiVitamin

Ensure your dog's vitamin and mineral requirements are met

- Micronutrients are crucial for your dog's well-being
- MultiVitamin provides the essential vitamins and minerals your dog needs
- Recommended for dogs fed with fresh food, highly active dogs, and those with reduced food intake due to overweight

B-Vitamin

All essential B vitamins for dogs

- Complete vitamin B supplement for dogs, containing eight different types of vitamin B
- Vitamin B may be beneficial for dogs undergoing intense training, shedding, or experiencing stressful environmental changes, among other things
- Vitamin B supplementation is particularly recommended for female dogs before mating and during pregnancy

When is vitamin B supplementation needed?

There are eight different types of vitamin B that play a crucial role in a dog's body, including energy and protein metabolism, the nervous system, and skin and coat quality. For example, Thiamine (B1) is important for dogs' metabolism and may contribute to increased appetite. Niacin (B3) is essential for energy and protein metabolism, and Folic Acid (B9) is important for DNA and RNA formation. Vitamin B supplementation is particularly recommended for female dogs before mating and during pregnancy. Vitamin B may be beneficial for dogs undergoing intense training, shedding, and/or experiencing stressful environmental changes.

ReHydrate

Fluid replenishment for your dog's recovery

- For maintaining fluid and electrolyte balance
- For faster recovery after exercise and demanding activities
- Can be given after fluid loss due to illness or diarrhoea
- Can be easily dissolved in your dog's drinking water or mixed with food while providing access to fresh water

Digestive Health & Well-being

MaxDigestive

Imbalances in your dog's digestive tract can be caused by diet changes, environmental changes, or ingestion of unsuitable substances. Stable gut flora and a well-functioning stomach are crucial for optimal nutrient absorption and the overall health of your dog.

MaxDigestive contains prebiotic fibers that help balance your dog's gut and optimize nutrient absorption. It's a highly beneficial supplement for active dogs, dogs travelling frequently, or dogs experiencing anxiety that need support maintaining a healthy digestive balance. MaxDigestive can also be beneficial for dogs struggling to maintain their weight and experiencing poor coat quality.

Coat & Skin

A nourishing and unique oil for your dog's well-being

- Rich in Omegas 3 & 6
- 100% plant-based
- With high-quality MCT oil for efficient absorption
- For dogs undergoing shedding or growing a new coat, dogs with a dull or lifeless coat, or with skin issues like dry skin, dandruff, or flaking
- Also provides care for claws and dry paw pads

Does your dog have an irritable gut?

By helping your dog maintain a healthy stomach and intestinal tract, you can improve your dog's well-being. The digestive system contains the body's largest number of immune cells. In the dog's digestive system, the small intestine is particularly important, as it absorbs vitamins, minerals, proteins, and fats. The small intestine is covered with cells that aid digestion and microflora of beneficial bacteria. Both pre- and probiotics contribute to balanced gut flora, improved digestion, and a stable pH that inhibits the development of toxic bacteria. By providing supplements with prebiotics, you are supporting your dog's good microflora, which promotes a healthy stomach, a strong immune system, and optimized nutrient absorption.

Linfröolja

100% Swedish cold-pressed flaxseed oil

- Rich in Omegas 3 & 6
- Flaxseed oil may help reduce inflammation in the body, effect the skin and coat positively, and be gentle on the stomach and intestines
- It is also suitable for dogs in need of additional fat in their diet

MaxDigestive

Balances and stabilises the gut flora

- Contains a prebiotic yeast culture that, which together with added inulin, promotes healthy gut flora for your dog
- Ideal for dogs with loose or irregular stools
- Recommended for dogs undergoing gastrointestinal medication
- Can be given daily to dogs with recurring digestive issues

Joints

Hyaluron 365

Optimal health and vitality for your dog with Hyaluron 365. One of the most popular joint supplements for dogs on the market. The results speak for themselves.

Building durability in your dog sometimes requires a little help along the way. Hyaluron 365 contains high-molecular hyaluronic acid that supports your dog's joint fluid, maintaining its viscosity and shock-absorbing ability. Hyaluron 365 also contains MSM, glucosamine, and chondroitin sulfate, which help the body cope with the stresses the joints endure.

MaxGlucosamine

- Promotes the regeneration of joint cartilage
- Naturally shellfish-derived glucosamine
- For older dogs and those undergoing high levels of joint and cartilage wear from intensive training
- Blended with a prebiotic drink that stabilizes the gut flora and enhances nutrient absorption

MaxGLM

- Pure extract from green-lipped mussels
- Naturally rich in glycosaminoglycans, omegas 3 & 6, essential for cartilage, connective tissue, skin, and joint fluid
- For dogs with stiff joints, reduced mobility, or skin problems
- Blended with a prebiotic drink that stabilises the gut flora and enhances nutrient absorption

Collagen

- For the maintenance and rehabilitation of soft tissues in the joints, such as tendons and ligaments
- Added hyaluronic acid optimises the function and quality of joint fluid
- MSM ensures the absorption of the supplement and supports the muscles surrounding the joint

Hyaluron 365

- A comprehensive joint supplement containing a unique combination of ingredients that support your dog's joint function and mobility
- Given prophylactically or at the early signs of joint stiffness
- For older dogs showing signs of joint stiffness
- For athletic or highly-active dogs

What is collagen?

Collagen is actually a group of different proteins. There are currently 28 identified collagen types, with the most well-known being collagen types 1-4. Collagen is the most abundant protein in a dog's body, including their joints. In other words, collagen is a crucial component for proper joint function. Among the functions of collagen is the development of cartilage, tendons, and ligaments.

Muscles & Recovery

Max Activity

Max Activity is the optimal supplement for those who want to provide their dogs with the best possible support without having to give multiple supplements - an easy solution for active dogs.

While the right diet can go a long way, dogs in our modern world face challenges that aren't always met by their regular nutrition. Max Activity allows you to optimise your dog's performance by supporting their muscles and joints while providing their body with the right nutrients for optimal recovery. Max Activity contains BCAA, selenium, vitamin E, and MSM to optimise muscle function and recovery, hyaluronic acid for joint support, and lecithin for stomach support, along with several important minerals to maintain an active physique.

MaxMuscle

- MaxMuscle is a muscle supplement suitable for dogs of all ages
- Contributes to supple and strong muscles
- Essential amino acids support muscle development
- Antioxidants protect muscle cells from free radicals
- Formulated with a prebiotic yeast culture that promotes the growth of beneficial bacteria and is gentle on the stomach

MaxMSM

- MaxMSM can be given to dogs that experience stiffness, easily develop lactic acid, and require extended recovery time
- MSM is an organic sulfur compound involved in the production of collagen and keratin in the body
- MSM is required for the regeneration of various cells in the body
- Ideal for supporting your dog's muscles, joints, skin, and coat

Max Activity

- Max Activity provides essential nutrients for muscle building and maintenance
- Recommended for recovery, muscle protection, and muscle growth
- Daily supplementation for active and working dogs
- Can also be given as an additional supplement before and during periods of demanding work, such as during hunting season or extended competition periods

ReHydrate

- Rehydration for faster recovery after training and demanding activities
- Can be given after fluid loss due to illness or diarrhoea
- For maintaining fluid and electrolyte balance
- Can be easily dissolved in your dog's drinking water or mixed with food with access to fresh water

Radital LinimentGel

- Can be used before training and activity to enhance warm-up
- Dual-action, first providing cooling and then warming
- Also suitable for strained muscles, tendons, and ligaments after work
- Also available in liquid form

Radital KylGel

- Well-proven cooling liniment in gel form
- Provides immediate relief
- Use directly on swollen or affected areas

Because we care!

We love our animals and we want the best for them. That's why conscious choices that promote care for the environment are a natural part of our daily operations, and a way of living and thinking - always.

As part of the manufacturing industry, we consider ourselves responsible for engaging in and acting responsibly on environmental issues. One of Trikem's environmental

goals is to minimise and compensate for any carbon footprint through a range of activities and commitments. Learn more about our sustainability engagement at trikem.se/sustainability. Because we genuinely care!

Through our core values, we bring Trikem to life as a brand and an organization:

Quality

We only work with carefully selected raw materials, and all manufacturing takes place in Sweden, giving us full control over the production process.

Expertise

We have extensive experience in physiology and nutrition, and we constantly stay updated on the latest research in various fields.

Well-being

We aim for well-being, regardless of performance level, and always strive to bring out the best in each individual.

Temperament

MaxRelax

An effective and well-regarded supplement used to create harmony and balance, and help your dog regain focus and concentration faster.

MaxRelax contains tryptophan, thiamine and magnesium, nutrients needed for your dog to relax and handle anxiety-inducing situations. MaxRelax can be given as a daily supplement or as a course before a stressful situation like travelling, fireworks, loud noises, or changes in environment. MaxRelax is a popular supplement renowned among dog owners throughout Europe.

Dogs and stress

It is common for dogs to become stressed, nervous, and unfocused. Stress is a chemical reaction created by a variety of hormone secretions. To regulate stress, the body needs to produce two balancing hormones: serotonin and melatonin. For that, the body needs tryptophan, thiamine, and magnesium.

MaxRelax

To help the dog relax and cope with pressing situations

- Given with the purpose of improving your dog's ability to relax and handle stressful situations
- For dogs that show anxiety in situations such as separation, changes in environment, loud noises, and fireworks

Coat & Skin

For more energy and endurance during training

- With high-quality MCT oil for extra energy
- MCT oil protects and fuels the brain, contributing to the dog's cognitive function
- Rich in Omegas 3 & 6
- 100% plant-based

What is MCT oil?

MCT stands for Medium Chain Triglycerides, which means that the oil chains are shorter than those found in 'regular' oil. The advantage of MCT oil is that it is more easily absorbed by the body's cells and can be quickly converted into usable energy.

Since MCT oil can be absorbed faster and more efficiently than other oils, dogs can experience a rapid energy boost. For example, it can be given to a dog with poor appetite that needs to gain weight, or as an energy supplement for dogs that need to avoid quick carbohydrates like sugar and starch, but still require more energy and endurance in their work.

Personalised consultations

Creating the best conditions for performance and well-being. Our qualified experts offer free advice based on your dog's specific needs.

Coat & Paws

Aloe Vera Shampoo & Conditioner

Aloe Vera is known for its positive effects on the skin and coat. The Aloe Vera Shampoo and Conditioner are excellent and nurturing choices for the dog's sensitive skin and coat.

Our Aloe Vera Shampoo gently cleanses and preserves the natural coat luster. Combined with the softening Aloe Vera Conditioner, it provides the coat with additional moisture and retains its insulating and water-repellent properties. Moreover, it contributes to coat maintenance by providing a detangling effect.

Gloss Shampoo

- Shampoo for a clean, shiny coat
- Dirt-repelling effect
- Keeps your dog shiny and clean for a long time
- Mild and natural citrus scent

Aloe Vera Shampoo

- Gently cleansing shampoo with natural Aloe Vera that cares for the skin and coat
- Moisturising properties that prevent drying and irritation of the scalp
- Mild and natural citrus scent
- Can also be used for puppies and pregnant females

Aloe Vera Conditioner

- Conditioner for dogs with natural Aloe Vera that cares for the coat and skin
- Protects the coat from wear and tear, tangles and static
- Fragrance-free
- For best effect, use Aloe Vera Shampoo before applying

Vitamin Shampoo

- Infused with vitamin B5
- Repairs and strengthens the coat
- For volume and a healthy coat
- Gently cleanses and moisturises

Coat & Skin

- For a strong and glossy coat
- Nutrients that reinforce the skin's natural barrier
- 100% plant-sourced oil
- Rich in Omegas 3 & 6
- With high-quality MCT oil for efficient absorption.
- To be mixed in with food

Rich in omegas 3 & 6
100% plant-based

Paw Ointment

- Easy-to-use balm for dry and cracked paw pads
- Tea tree oil provides a mild antiseptic effect
- Beeswax, lanolin, and vegetable oils create a protective barrier and prevent dehydration
- Protects paw pads against cold and salt

Home Care

Ear Cleaner

Our Ear Cleaner works by dissolving dirt, wax, and dead skin cells in the outer ear canal. Contains a mildly antiseptic agent that gently creates an unfavourable environment for unwanted bacteria and microorganisms.

Ear Cleaner not only provides a cleansing effect but also neutralises unpleasant odours that may come from the pet's ears. By routinely cleaning your dog's ears, you can prevent problems such as itching, inflammation, and other ear-related issues.

Ear Cleaner can also be used for cats. Fragrance-free.

Saline solution

- Physiological saline solution for cleansing minor wounds, skin injuries, and eyes
- For cleaning cracked paws
- Convenient packaging for easy application

Chlorhexidine spray

- Antiseptic spray for disinfecting and cleansing minor wounds
- Clean the skin from dirt before spraying with chlorhexidine spray
- Convenient packaging with practical spray nozzle

Chlorhexidine Shampoo

- Antiseptic shampoo that disinfects and cleanses the coat and skin
- Contains moisturising ingredients to prevent skin dryness
- For the best effect, apply the shampoo and leave it on for 10 minutes before rinsing thoroughly

In the home care range for dogs:

- Saline solution
- Chlorhexidine spray
- Chlorhexidine shampoo
- Ear Cleaner
- Scissors
- Nail clippers
- Tweezers
- Plastic gloves
- Sterile wound dressings
- Cotton
- Gauze
- Elastic self-adhesive bandage
- Adhesive tape
- Thermometer
- Muzzle
- Tick remover
- Clean towels

Paw Ointment

- Easy-to-use balm for dry and cracked paw pads
- Tea tree oil provides a mild antiseptic effect
- Beeswax, lanolin, and vegetable oils create a protective barrier and prevent dehydration
- Protects paw pads against cold and salt

Ear Cleaner

- Acts as a cleanser by dissolving dirt and wax in the ear canal.
- Creates an unfavourable environment for bacteria and fungi while neutralising unwanted odours.
- Gentle and suitable for routine ear cleaning
- Fragrance-free

Radital LinimentGel

The equine remedy for muscles since 1954

Radital Liniment is a well-proven and highly regarded liniment used on animals and humans since more than 65 years. Available in both liquid and gel presentation. LinimentGel has a dual-acting effect, initially cooling followed by pleasant warmth.

Hyaluron

- High-density molecular hyaluronic acid
- Hyaluronic acid is naturally found in the body's joints, providing shock-absorbing properties to synovial fluid and facilitating smooth movement of joint surfaces
- Provides the body with the right conditions for normal motion and an active lifestyle

MSM

- MSM is a dietary supplement containing the organic sulfur compound methylsulfonmethane
- MSM promotes normal collagen formation and plays a central role in the development of muscles, joints, hair, and skin

Mygg & Fästing

- Effective protection against mosquitoes, midges, and other biting insects
- Reduces the risk of tick bites
- Easy to apply and gentle on the skin
- Learn more about Mygg & Fästing at trikem.se

Radital KylGel

- Well-proven cooling liniment in gel form
- Immediate effect
- Apply to affected or swollen areas
- Massage onto muscles, joints, and tendons after exertion

Radital VärmeSalva

- Liniment salve that provides intense warmth
- Massage onto affected areas such as muscles, joints, and tendons
- Made of a unique composition of essential oils

HandSprit 70%

- Hand disinfectant, effective against bacteria, viruses, and fungi
- A great complement to regular hand washing
- Moisturising agents that reduce the risk of dehydration

Trikem also offers an extensive range of horse-related products. You can find our full product range at trikem.se

Expertise and quality are our hallmarks

Quality means everything to us. That is the way it has been for us since our founder, Kjell Gustafsson, developed our very first product almost 70 years ago.

To ensure the highest quality standards and with utmost consideration for the environment, our manufacturing operations are still handled in-house in our two dedicated production centres in Klågerup and Malmö. We stay up to date with the latest research and constantly evolve our products to keep up with changing conditions and needs. With knowledge and passion, we help you provide your dog with the right conditions for well-being and good performance.

Contact us

Guided by our genuine love for dogs and a strong commitment to dog sports, we are a team of dedicated enthusiasts. We have many years of experience in nutrition, biology, physiology, and chemistry, and we are happy to share our knowledge with you. Get in touch with us, and we will assist you with your questions and concerns.
